

Why do so many trust Novarad?

Novarad is a healthcare IT company founded on the principles of innovation, customer focus, and agility. We lead the market with an enterprise imaging solution that brings together technology in a way no one else can within the facility or remotely.

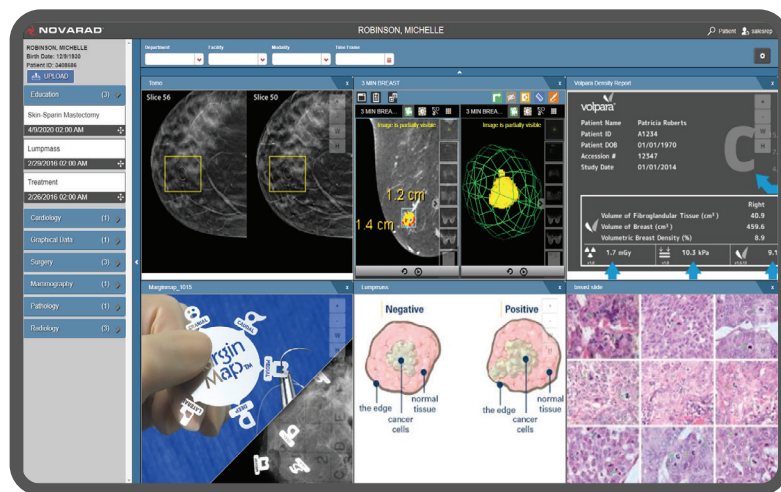

“Novarad has enabled faster read times for sure, which ultimately results in better patient care.”

Jacy Lightfoot
Director of Radiology

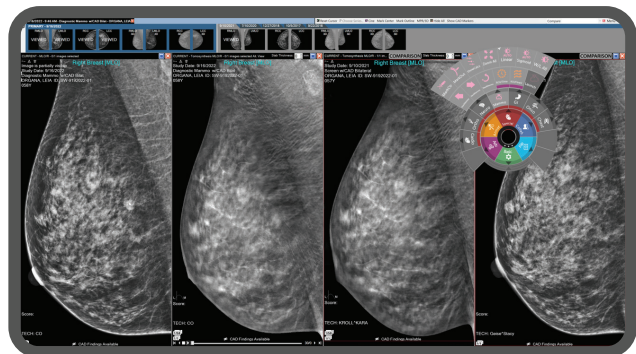

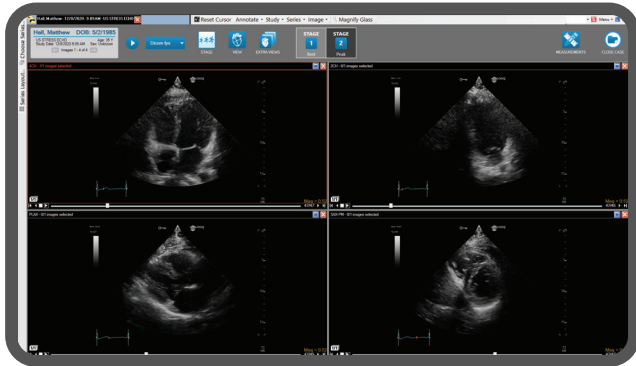

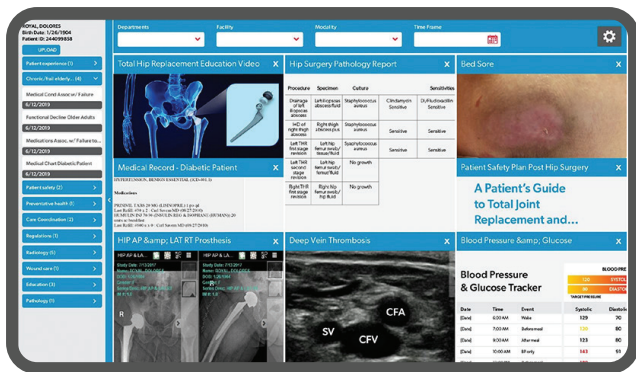

Why NovaPACS EI is critical to your hospital/facility?

Novarad is an expert in hospital deployment of PACS software systems, Radiology and Cardiology software systems, and medical imaging management software solutions. Our software includes scalable and customizable solutions for 500+ bed hospitals down to 26 bed hospitals, Critical Access Hospitals, and Rural Hospitals. Our PACS with enterprise imaging software and VNA capabilities allows us to meet all encounter-based departments' needs in addition to Radiology Imaging and Cardiology Imaging.

NovaPACS EI end to end solution:

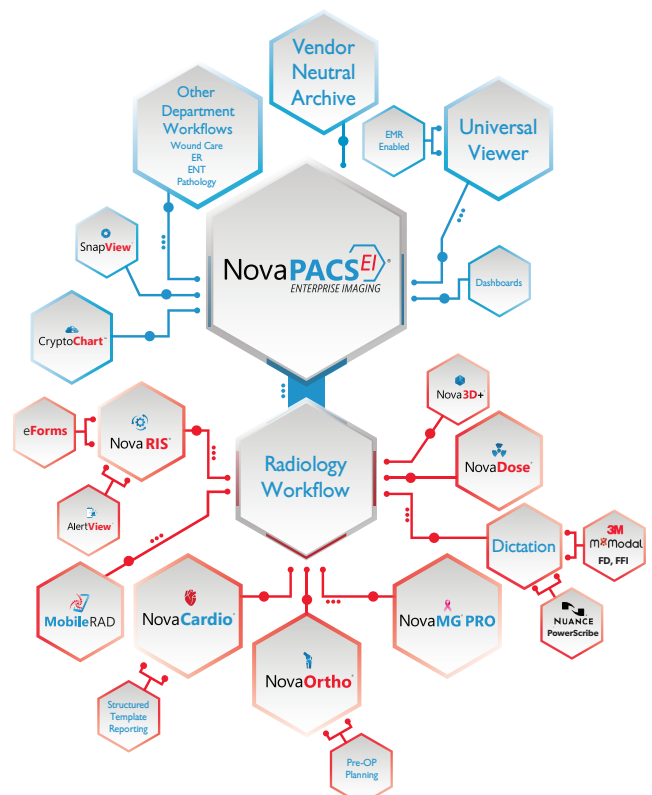

- Breaks down patient information silos
- Image enables your EMR with a patient-centric Universal Viewer
- Assists in providing value-based care
- Improves doctor-patient engagement with the power of storyboards
- Improves multi-specialty and across department collaboration

SnapView allows clinical staff to quickly capture clinically relevant images with their mobile device and securely upload them directly to the VNA (archive) without any PHI ever being downloaded or stored on the device. The SnapView app works on Android or iOS devices.

- Enterprise archive (Vendor Neutral Archive)
- Easily capture and use images and reports from other departments
- Departmental workflows
- Patient image and information sharing
- Image enables EMR/HIS
- All in one viewer
- Integrates with any EMR, HIS, or EHR
- Supports remote reading
- Worklist management allows the radiologist to see cases by specialty, licensure, and other condition
- Alerts for worklist prioritization based on clinical priority and contracted SLA
- Intuitive user interface
- Scalable and highly customizable for each user
- Advanced image processing and manipulation included
- Add Enterprise Imaging to all solutions

How do Novarad products support the enterprise?
